

Hand Healed Metal detector

For Malls, Airport, Hospital and
Industrial use

SRTEC Hand Healed Metal Detector is designed to detect all types of metals (ferrous , nonferrous, ferrite) .The search coil & control modules are housed in a aesthetically designed baton. The HHMD designed for quick response & indication. All the controls & audio visual indication are provided on the handle of the baton. Sweep the Detector over target area such a way Detector must be in Motion to detect Metal .

Features :

- For indoor use.
- Micro Controller Based.
- LED indicator for better observation.
- Low Battery LED indicator.
- In-built control unit & battery charger port.
- Audio/ Visual indication for detection.
- Easy to handle.
- Inbuilt control switch for Vibration / sounder.

Technical Specification :

Batteries	9 V
Red LED	Indicate Low Battery
Yellow LED	Detection of Metal Object
Green LED	Detector is ON
Floor Space Required	860 X 842 mm
Weight	Approx 650 Grm
Body Material	PVC
